HRPZ II, Kota Bharu

## Background

Chronic kidney disease (CKD) is highly prevalent worldwide, including Malaysia. This disease entity is associated with high risk of cardiovascular disease, end stage kidney disease and mortality. In addition, it causes huge health care burden economically.

Early identification and management of CKD is crucial to prevent its progression and related complications. This is in line with the theme of 2025 World Kidney Day :

**“Are your kidneys OK? Detect early, protect kidney health”.**

## Objectives

To provide in-depth understanding of CKD, focusing on pathophysiology, diagnosis, treatment and management strategies among healthcare providers.

## Who should attend?

- Primary care physicians
- General Practitioners
- Nephrologist/ Nephrology fellows
- Internal Medicine Physicians
- Medical officers
- Paramedics involved in the care of CKD population
